To Whom It May Concern:

FreeLinc is excited about the opportunity to work with your organization to supply remote cordless communication products for your two-way portable radios. FreeLinc's Wireless Systems utilize Near-Field Magnetic Induction (NFMI) technology to create the wireless communication link.

Pursuant to your request, this letter is written to confirm that Freelinc is the sole source manufacturer and supplier for the FreeMotion 100 wireless headset and FreeMic 200 cordless speaker-microphone. There are no other sources for cordless two-way radio systems that utilize NFMI technology.

FreeLinc is also part of the GSA IT Schedule 70 contract family. Our contract number is GS-35F-0116V. Visit www.gsaadvantage.gov, enter "FreeLinc" in the search field and you'll find the entire compliment of FreeLinc products.

Should you have any questions, please feel free to contact FreeLinc headquarters at 801-221-7796.

Sincerely,

Randy Bailey
President
